

Module: ASME

Module head: Inzamum Hussain Mazumder , Triranga Bikrom Borah

### PLOT TWIST

Participants will be provided with situations where some basic concepts will be missing or a bit altered. They have to come up with ideas to understand and work in such a situation. They need to write a detailed description of their situation individually. They have to include the effect of the changes provided to them in the problem statement and also describe their method to work in the situation.

#### Rules:

1. Participants need to participate individually.
2. They will be provided with a google form to choose two statements from the given list of statements and according to first come first criterion participants will be allotted their respective situation.
3. Participants will be judged on the basis of their ideas. Points will be awarded considering the extent of innovation and proper technical explanation.

Organizers:

1. Anindita Dey (8638098500)
2. Yugabrat Gogoi (8011254645)
3. Ankit Singh (7480074695)
4. Swatha Das (8011790606)
