

**Module Name:** Cyberwarp

**Module Head Name:**

Anubhav Sachan

Arpit Singh

**Event Name:** Cyberbot

**Event description:**

Cyberbot gives you the perfect opportunity to start and finish the first step in your web development journey in 2 days, and test out your knowledge for a cash prize immediately after.

A 2 day workshop will be held that teaches you all the basics required to make a website and host it on git. No prerequisites required.

CSS, HTML, JS, and Git are things that help you no matter what you want to develop, whether it be a site in React, an android app, or a backend REST API.

The final contest requires you to submit a robot themed website that will be judged on basis on functionality, creativity, and code readability. Take the first step in your Hacking journey!
