Module Name : ROBOTRON

Module Head Name :

Utkarsh Rai

Yogesh Shukla

Event Name: ROBOMANIA

Event Description:

"Robots... I think that is a hot topic." ~ Bill Budge

Are you bored? Online world of pandemic must have made you feel so.

So here it is, the most awaited event of TECNOESIS.

ROBOTRON module of TECNOESIS is back again with ROBOMANIA, a platform to showcase your skilled hand.

Bots come in our mind either with fantasy or with luxury. Its time to put your fascination on ground. So put your wire, metals, and circuit in place and your efforts to make it a robot with features that are just Wow.

Rules:

1.You will have to prepare your project using either a hardware (if it's available) or send the simulation using simulation software like tinkercad.

2.Make one video of your project explaining the working so that you can convince the judges about your project. In the video you can also present your ideas related to it. Try to make the video short and crisp.

3.You will have to submit the video to the provided link.
